
Construction support

Capability statement

Construction is a key stage in the life-cycle of a subsea pipeline system and can determine its future integrity, cost and lifespan.

Building your future success

The quality of the processes used to install any hardware define the likelihood that the system is fit for purpose and efficient throughout its life. Jee provides specialist design, analysis and support for all your projects, whether you are placing a mattress, tying in a spoolpiece or installing a complete pipeline system.

Providing a high quality engineering consultancy service is of paramount importance to us, and we are proud to be certified by Lloyd's Register QA to ISO9001 for "Provision of pipeline engineering services to the oil and gas industry" since 1995.

Range of expertise

We have a wide range of expertise in the construction of subsea pipeline systems including:

- ✦ Cost review of pipeline installation methods
- ✦ Installation of post-lay pipeline stability systems
- ✦ Pipeline routing
- ✦ Trenching studies
- ✦ Installation calculations

We also run public and in-company courses on installation calculations and construction of subsea pipelines.

Proven track record

- ✦ Colombo harbour development 2008 – Modification of existing line
 - ✦ Venture 2008 – Low cost pipeline installation
 - ✦ ExxonMobil 2005 – Upheaval buckling analysis of flexible flowline
 - ✦ Technip 2005 – Mattress placement study
-

Jee assessed the trawl gear interaction for several untrenched pipelines. Their recommendations were very valuable for the successful completion of our project.

Brian Cheung, Maersk E&C Senior Piping Engineer, Aker Solutions

List of related services

- ✦ Feasibility, conceptual design
- ✦ Flow assurance
- ✦ Pre-FEED and FEED
- ✦ Field development studies
- ✦ Verification
- ✦ Detailed design specialist studies
- ✦ Installation engineering
