# Project management

## Capability statement

Project management skills are a basic requirement for the successful completion of any project. From experience, the importance of these skills becomes more evident as a project expands.

### Project management experience

Jee has built up a strong team of knowledgeable engineers over the last 20 years. The experience they have gained on a wide range of technical studies has led to the development of a team capable of managing complex engineering projects.

Jee has been involved in a number of large technical studies, requiring project management skills to control resources from a variety of companies. These have included joint industry projects and more recently a consortium project for BP.

Our expertise and wide base of contacts, both developed over many years, provides a source of skills which can be utilised within projects to supplement in-house expertise.

### Quality assured

Jee works under its quality management system, which is certified to ISO 9001, helping to ensure that the key objectives of project management are achieved.

In order to achieve these objectives, We work with the following in mind:

- ✦ Setting clear goals
- ✦ Effective planning and communication
- ✦ Commitment and motivation
- ✦ Utilising industry contacts effectively
- ✦ The importance of flexibility and adaptation throughout the project

With Jee project managing, our clients continue with normal operations, whilst being assured that all work is being carried out by a project team built of experienced, chartered engineers.

### Proven track record

- ✦ Perenco 2008 – Integrity management of offshore structures
  - ✦ ISO Code and Statoil 2008 – Best practice guide for lifetime extension
  - ✦ ExxonMobil, ConocoPhillips, Shell, Statoil and Subsea 7 2005 – Overtrawling of large diameter pipelines
-

---

The analysis was carried out within the timescale to a high standard. In conclusion the service offered surpassed expectation and is fully recommended.

Karl Dawson, Engineering Manager, Pipeline Engineering Solutions
