

# Joint industry projects

## Capability statement

Joint industry projects (JIPs) bring together commercial, technical and regulatory stakeholders to deliver world-class solutions at reduced cost.

### JIP specialists

Jee has many years of experience in managing JIPs . Our subsea expertise and experience of working on different projects with many clients makes us uniquely suited to participating in and running joint industry projects.

To manage the numerous companies and resources involved, Jee provides a central base from which all planning and communication can be channelled ensuring an impartial seamless integration of resource and skill.

Many of our engineers are certified by the Association for Project Management and as a company we have a wealth of experience in the legal and contractual issues arising in such projects.

### Plug the skills gap

As Jee works across the whole of the subsea industry we can often see opportunities for stakeholders to work together to solve common problems. The output from such JIPs can be new standards, design guidelines or software.

Jee is known and trusted by many industry leaders. Projects we are involved with have significant interest and industry support. This aids in securing first-rate project partners and cohesion throughout the project life.

### Proven track record

- ✦ ISO Code and Statoil 2008 – Best practice guide for pipeline lifetime extension
- ✦ BP and Shell 2007 – Fishing safety website SafetyNet
- ✦ ExxonMobil, ConocoPhillips, Shell, Statoil and Subsea 7 2005 – Overtrawling of large diameter pipelines
- ✦ ISO Code and Institute of Petroleum 2006 – Testing of mechanical connectors
- ✦ Shell 2000 – Trenching guidelines

---

Serving the oil  
and gas industry  
since 1988

---

### List of related services

- ✦ Support for new pipeline projects
- ✦ Pipeline operations support and integrity management
- ✦ Analysis tools
- ✦ Project management
- ✦ Fishing interaction
- ✦ Bend restrictors
